Disaster Recovery & Response

Large Loss Restoration and Environmental Staffing

Nationwide, Puerto Rico, US-VI, Canada and Mexico

LGS Staffing is an experienced, full-service staffing, recruiting and human resources firm focused on priority service and technology driven innovation. We offer flexible workforce solutions, regardless of the size of the project or organization.

As the leader in disaster staffing, our dedicated disaster response team has more than 10 years of catastrophe and large loss experience working with private engineering, restoration and environmental response contractors as well as various government organizations. We can respond quickly anywhere in the US, Puerto Rico, Canada and Mexico. Our staff is experienced in managing small technical environmental projects and large loss catastrophe's requiring thousands of employees across multiple work sites. Our experienced project managers will be onsite to manage your workforce so you can focus on the job, not managing people.

More than just providing people, we are experts at organizing data to ensure your projects run smoothly. In addition to tracking time and providing fast accurate invoicing, we carefully manage the necessary documents and certifications to help keep your project in compliance. We will work directly with your project or corporate accounting department to reconcile data weekly. Drug screens, physicals, E-verify, background checks, DMV reports, fit testing, HAZWOPER, Hazmat training certifications, OSHA certifications and all other employee data is scanned and attached to each employee's electronic file and ready for review. Our electronic pay system ensures that employees are paid accurately and on-time while preventing work stoppage or onsite incidents. Our system has built in custom reports which can generate complete certified payroll reports immediately after payroll runs.

Our company is comprised of an entrepreneurial spirit and a commitment to excellence which is demonstrated in our day-to-day activities, both in the office and on-site. We are dedicated to working safely and preserving a culture where employees at all levels are respected and recognized for their valuable contributions.
